Alimentos Enriko gained real-time visibility & improved its order management with Beas Manufacturing

Alimentos Enriko is a Colombian company with more than 37 years of experience, specialized in the production of meat, vegetables and sauces of the highest quality, serving the Fast-Food market in the country. On August 23, 2021 they obtained their FSSC 22000 certification granted by NSF International, which endorses their food safety system guaranteeing the safety of their products. Becoming the first meat products facility in Colombia with this certification.

Challenges

- Lack of information on the production costs of products and processes.

Solution

- Substantially improved data collection and streamlined the work order management process.
- In-process and finished product costs have been standardized and have costs in a timely manner that can be monitored at any stage of the process.

Results

- The determination of selling prices from the knowledge of costs helps a lot to have reliable information to determine the expected profitability margins.
- The Qbano franchised customer channel represents 80% of the product sales revenue in their company and it is very easy and fast to cost new products in the portfolios.

“

The agile management of work orders provides information for decision making.”
