Shanghai MTC Information
Technology Co.,Ltd.

Xinjiang Taikun Group was founded in 1996. It is an agricultural and animal husbandry enterprise group that relies on Xinjiang's characteristic agricultural resources, is based in Xinjiang, has a national layout, and radiates Central Asia. The group has four interrelated industrial lines of plant protein (high protein raw material), feed, poultry breeding, and pig breeding, and has established more than 50 wholly-owned or absolutely holding subsidiaries in Xinjiang, Northwest, Southwest, and South China.

Customer Challenges

- The business develops quickly, therefore, it needs an information system to support it flexibly and rapidly.

Solution

- Ability to easily validate documents and business processes without the need to write a custom code which is expensive to maintain.
- Use reports of Boyum to give a business panorama and find the cause documents.

Results

- Define different document interfaces for different roles and businesses to meet the individual needs of business operators.
- Functions like One-click delivery, one-click invoicing, etc. help business operators to process quickly and save labor.

"WITH THE BOYUM SOLUTION PACKAGE, IT IS POSSIBLE TO TAKE FULL ADVANTAGE OF THE FLEXIBILITY OF SAP, REDUCING COSTS OF DEVELOPMENT AND MAINTENANCE, AND EMPOWERING BUSINESS SUPPORT BETTER."
