

# From a conventional accounting system to a **world-renowned ERP** with B1 Usability Package

Sumelab is an Ecuadorian company dedicated to the distribution of pharmaceutical products that offers all its customers located in the 18 provinces where it has coverage a timely delivery service with a variety and availability of medicines, consumer products and supplies. B1 Usability Package was implemented with SAP Business One to take them to the next level, from a conventional accounting system to a world-renowned ERP.

## BOYUM SOLUTION

B1 Usability Package

## PARTNER

Heinsohntech

## Challenges

- SAP Business One did not cover 100% of the company's requirements, so it was necessary to have B1UP so that operations, especially logistics, can be carried out efficiently

## Solution

- Those requirements that were outside the scope of the standard version of SAP Business One were covered
- The functionalities used are the custom buttons, the validations, the universal macro-type functions, SQL reports, dynamic code, message boxes, and managing master data and documents

## Results

- Without B1UP it would not have been possible to automate the generation of picking lists, cover the audit functionality, generate the .txt file for purchase orders, import business plans from Excel, manage master data and documents due to vendor changes

**"WITHOUT B1UP IT WOULD NOT HAVE BEEN POSSIBLE TO AUTOMATE PICKING LIST GENERATION, TO COVER THE AUDIT FUNCTIONALITY, (...) MANAGE MASTER DATA, ..."**

Jean Michael Suárez Pérez, Operational and IT Manager, Sumelab Cia. Ltda
